McGill University

Hayley is a licensed Architect and Urban Designer with over nine years of experience working with public- and private-sector clients. Hayley has worked on residential projects at all scales and phases of construction, ranging from multi-tower high-rise developments to mid-rise blocks to single family homes, from the planning and approvals phase through to contract administration. Her institutional work includes a 175,000 sq. ft bioscience research facility at Brock University designed to meet LEED Silver standards.

With an aptitude for meeting the design and coordination challenges of complex projects and difficult urban sites, she brings a sensitivity to the physical and social context of each project. Hayley continues to be actively involved in the academic community and regularly sits as a guest critic on design review panels at OCADU and the University of Toronto.
